# Fees & Charges

**Effective as at 28th June 2018** and are subject to change

We don't like to see our members paying fees. Which is why we'll show you a number of ways to manage your account with little or no fees and charges. Unfortunately, some are unavoidable, particularly when we are billed by banks and other financial service companies for third party services. We do everything possible to keep these to a minimum and ensure they are fair and reasonable.

The bottom line is, compared to a bank, you will pay a lot less at SCU. If you are running a small business, that can amount to several hundred dollars of savings every month.

The credit related fees listed in this brochure may not apply to all contracts entered into with SCU. If you apply for credit all fees applicable to your loan or credit facility will be disclosed in your credit contract.

### Break Cost Fee - Fixed Rate Mortgage Secured Loans

Break costs are payable when you are taken to have broken your fixed rate period. This occurs if during the fixed rate period:

- you repay all of the balance owing on your loan; or
- you make unscheduled repayments (totalling \$10,000 or more per year); or
- you switch from one fixed rate loan to another, or switch from a fixed rate to a variable rate option; or
- if the total amount owing becomes repayable because you are in default.

The break costs when repaying a fixed rate loan (or a portion of the loan\*) are calculated as the sum of the present value of repayment cash flows remaining in the fixed rate period (including the balance scheduled to be outstanding at the end of the fixed rate period as a repayment), discounted at the current lending rate for new loans for the remaining fixed rate period, **less** the principal amount that is currently outstanding. \* Note: If a partial break cost is being calculated, then the answer is multiplied by the ratio of the principal repayment to the total principal that is outstanding at the time of the break.

**Warning:** Break costs can be high and may increase the amount that you owe to us. An information brochure regarding break costs is available on request – the brochure includes a ‘worked example’ of a break cost calculation. You can get an estimate of an applicable break cost at any time by contacting us.

There is uncertainty and risks associated with fixed rate loans. For example:

- if interest rates drop substantially from the time that you take out a fixed rate loan, you could have to pay a very high break fee to terminate the loan early;
- it is hard for anyone to accurately predict whether interest rates will go up or down, by how much and when; and
- the loan may not be suitable for you if you plan on terminating the loan within the fixed rate period, or if you would want to terminate the loan within the fixed rate period if interest rates dropped after you took out the loan.

### Fixed Rate Loans - Break Cost Administration Fee

In addition to the Break Cost Fee an Administration Fee of \$50.00 is payable for all Break Cost Fee calculations on fixed rate loans.
